2.3 Important Administration Instructions

Clobazam Oral Suspension: 2.5 mg/mL for oral administration. Each bottle contains 120 mL of a white to off-white suspension.

8.5 Geriatric Use

Clobazam should be used with caution in geriatric patients. Due to the potential for impaired renal and hepatic function, consider a lower initial dosage and increase by smaller increments in geriatric patients requiring initiation with clobazam.
Oral administration of clobazam (0, 50, 350, or 750 mg/kg/day) to rats throughout pregnancy and lactation resulted in increased...
